## DETONATING CORD AND SAFETY FUSE

F-cord 10 is a detonating cord for both commercial and military use. The cord is based on PETN-explosive and is coated with PVC or thermoplast. F-cord 10 is very flexible and suitable to be used in work, where the cord has to be tied in cold circumstances. The product has an excellent water resistance.

Forcit imports UNIKORD safety fuse produced by Kemijska Industrija KAMNIK d.o.o., Slovenia. The safety fuse endures storage of long duration in dry and cool conditions.

	F-Cord 10	UNIKORD
Coating	PVC/PE-thermoplast	PE
Amount of explosive	10-12 g/m (PETN)	6,1 g/m (black powder)
Velocity of detonation / burning	> 6 000 m/s	120 s/m
Amount per reel / package	1) Small pack 90 m / 90 m 2) Normal pack 200m/1000m	250 m / 1 000 m
<b>Transportation classification</b>		
RID /ADR	1.1D, Cord, Detonating	1.4S, Safety fuse
IMDG	1.1D	1.4S
UN Number	0065	0105
