## DETONATORS IN 1.4S PACKAGING

**Forcit produces detonators also for military use.** Forcit produces high quality electric detonators called Firex. Forcit can also provide customers plain detonator no. 8's in transport classification 1.4S.

For military engineering applications Forcit provides a useful 1.4S package for electric and plain detonators. The classification 1.4S eases the transportation and storing of the detonators.

Classification	Resistance of the Detonator $\Omega$	Firing Current A		Firing Impulse mJ/ $\Omega$	
		No ignition under	Certain ignition	No ignition under	Certain ignition
UR-MS B/1a	Depends on the length of the cable	0,45	1,0	8	16
VA-MS C/2	$3,6 \pm 0,3$	1,2	2,2	80	140

*The 1.4S classification in detonator packaging has been found practical for military uses.*
